

Many renters
can actually
afford to buy
a home,
so why
don't they?

If you believe...

- Buying a home requires a large down payment.
- The monthly payments would be too much even if you qualified for a mortgage.
- The benefits of owning a home do not outweigh the benefits of renting.

Consider these facts...

- We have loan products that require very little down and no money down for veterans.
- Most find their mortgage payments to be comparable to what they were paying in rent.
- Equity is a great benefit of home ownership as well as privacy, freedom and tax deductions.

Finding the
path to your
new home is
**quick and
it's free.**
